KING'S POLICE MEDAL.

NOTIFICATION.

(POLICE.)

Delhi, the 2nd January 1922.

No. F.-45.—His Majesty the KING, EMPEROR OF INDIA, has been pleased to confer the King's Police Medal, and in two cases a bar to the medal previously awarded, on the following officers and men of the Indian Police establishments :—

BENGAL.

Name of officer and rank.	Statement of services for which in particular the decoration has been conferred.
20. John Alphonse Marie Joachim Goldie, Deputy Commissioner of Police, Calcutta, and officiating Deputy Inspector-General of Police, Intelligence Branch, Criminal Investigation Department, Bengal.	This officer joined the Indian Police in 1908, and was employed on district work until September, 1916, when he was specially selected to hold charge of the Special Branch of the Calcutta Police, an appointment involving heavy and dangerous duties. This Department, while under Mr. Goldie's control, was responsible for the cessation of political crimes not only in Calcutta but, in co-operation with the Intelligence Branch, throughout Bengal. Throughout his service in this department, Mr. Goldie has shown great devotion to duty and has performed valuable political and secret work, often at considerable personal risk. On one occasion he succeeded after a struggle in capturing an absconder armed with a loaded revolver.
21. Jagadish Dube, Constable, Hooghly district.	These constables, in February 1921, displayed conspicuous gallantry in the arrest of the leader of a gang of burglars whom they had surprised after midnight in a shop at Bansberia. The gang, numbering about ten in all, turned on the constables, wounding Jagadish Dube with a knife. The latter, with the aid of his fellow-constable Baliram Singh, clung tenaciously to one prisoner, whose arrest was effected, and who proved to be a notorious Punjabi offender with six previous convictions.
22. Baliram Singh, Constable, Hooghly district.	
23. Babu Umesh Chandra Chanda, officiating Deputy Superintendent of Police, Dacca.	This officer joined the Bengal Police as a Sub-Inspector in the year 1894. His work has always been of an exceptionally high standard. In several enquiries of a secret nature he has displayed both tact and courage and has throughout his service proved himself a most trustworthy and zealous officer.
24. Francis John Lowman, Superintendent of Police.	This officer joined the Indian Police in 1903, and was posted to the Bombay Presidency. In 1908, his services were transferred to Eastern Bengal and Assam, where, under circumstances calling for the exercise of the highest qualities, he proved himself a most efficient officer. From April 1912, he held charge of the Special Branch of the Calcutta Police, where for four years he showed a whole-hearted devotion to duty, and exceptional ability. Subsequently, while on district duty, his rare tact and insight elicited special comment. He has performed valuable political and secret services at considerable personal risk.

Minister in charge : The Hon'ble Sir S. N. Banarji, Kt.

No. 194 P.H.—The 9th January 1922.—Under rule 7 of the Local Authorities' Loans Rules, 1915, as subsequently amended, it is hereby notified for general information that the **Nadia.** Government of Bengal (Ministry of Local Self-Government) intend to sanction the following application from the Chairman of the Krishnagar Municipality, in the district of Nadia, for a loan of Rs. 86,800 from Government, bearing interest at the rate of six per cent. per annum, and repayable in thirty equal annual instalments of Rs. 6,305-14-9 each, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the said municipality.

In addition to the details required on the reverse, clear information should be given below under the following heads:—

- | | |
|---|--|
| (a) If the ordinary surplus is insufficient to meet the charges of the proposed loan, the particular steps which the Municipality has taken, or has agreed to take, in order to make good the deficiency. | A water rate at $7\frac{1}{2}$ per cent. on the annual value of holdings will fetch an annual income of Rs. 24,000 which will meet both the recurring and loan charges. |
| (b) The reserve of taxation or other possible means of increase in the revenues of the Municipality. | Installation of water-supply scheme will possibly improve the sanitation of Krishnagar, so people will build new houses which will go towards the increase of income. |
| (c) A statement of all outstanding loans specifying, in respect of each loan, the date when taken, the purpose (very briefly), the amount, the annual charges involved, and the amount still payable. | Rupees 1,00,000 for the water works scheme; 2nd January 1921. The first instalment of repayment of loan will fall due on 22nd October 1922, if the water-works be completed by March 1922. |
| (d) Any explanations in regard to receipts and expenditure to show the true financial position of the Municipality when such position is otherwise than the ordinary surplus would indicate. | The receipt of water tax on the whole will show a tendency to rise after completion of water works scheme, as it is expected that many people will come back to their ancestral houses who have left for malaria, etc. |

A full explanation is given in paragraph D of my letter submitted herewith as well as in statement D on the cover.

In addition to the details required on the reverse, clear information should be given below under the following heads:—

- | | |
|--|--|
| <p>(a) If the ordinary surplus is insufficient to meet the charges of the proposed loan, the particular steps which the borrowing body has taken, or has agreed to take, in order to make good the deficiency.</p> | <p>(a) Though the ordinary surplus falls short on account of payment of liabilities due to land acquisition and those of Messrs. Jessop & Co., position is otherwise than the normal surplus indicates. The municipality has had no such liability to meet for some years to come save and except the ordinary expenditure. So there will be an adequate amount entirely sufficient to liquidate the loan.</p> |
| <p>(b) The reserve of taxation or other possible means of increase in the revenues of the local body.</p> | <p>(b) There is still room for enhancement of the water rate by $\frac{1}{2}$ per cent. Further the general revision of assessment which is to take effect from the next official year will secure an additional income, in view of the large number of houses being built and improvement effected to older ones an additional income of Rs. 2,000 and possibly more.</p> |
| <p>(c) A statement of all outstanding loans as well as the annual charges involved on their account.</p> | <p>(c) A loan of Rs. 25,000 was taken on 23rd March 1918 as per Municipal Department letter No. 782M., dated 18th March 1918, for water supply scheme repayable in twenty years by annual payment of Rs 2,163 principal including interest. The unpaid amount of this loan is at present Rs. 22,457-7-3.</p> |
| <p>(d) Any explanation in regard to receipts and expenditure to show the financial position of the municipality when such position is otherwise than the ordinary surplus would indicate.</p> | <p>(d) The deficit in the normal surplus does not show the true financial position of the municipality. Even after payment of the heavy amount of Rs. 30,835 in respect of water works, capital outlay and establishment charges, etc., the balance on 31st March was Rs. 5,662, which clearly states the position of the municipality other than what the deficit in the normal surplus indicates.</p> |

H. L. STEPHENSON,

*Chief Secretary

No. 1276-C.S.R.

Delhi, the 27th December 1921.

RESOLUTION.

His Majesty's Secretary of State for India has been pleased to decide that additional pensions shall be granted to military officers who have held certain high civil posts and have fulfilled the conditions stated in the following paragraphs.

2. The additional pensions will be of two classes; a higher pension of £200 a year and a lower pension of £100 a year. Their grant will be subject to the condition that the total pension of an officer receiving the higher class additional pension shall not exceed £1,000 a year and that of an officer receiving the lower class shall not exceed £900 a year.

3. (a) The pensions will be earned by approved service of the following kinds in a qualifying post :—

- (i) Three years' substantive service; or
- (ii) Three years' continuous officiating service; or
- (iii) Three years' continuous officiating and substantive service.

(b) All privilege leave, and all leave which, under the terms of the Resolution of the Government of India in the Finance Department, No. 1260-C.S.R., dated the 21st December 1921, counts as privilege leave, will, if taken during such service, count as service.

4. The posts qualifying for the higher pension will be all civil posts which now carry a pay of not less than Rs. 4,000 a month. The posts qualifying for the lower pension will be all civil posts which now carry a pay of not less than Rs. 3,000 a month.

5. The period of three years' service prescribed in paragraph 3 above is an absolute minimum, and no portion of either class of additional pension will be admissible to an officer who has held a qualifying post for a shorter period. A period of three years, spent partly in a post or posts qualifying for the higher, and partly in a post or posts qualifying for the lower class additional pension, will, however, entitle an officer to a lower class pension.

6. An officer serving in a post on a progressive or time-scale pay rising to a maximum of Rs. 3,000 or of Rs. 4,000 will be entitled to count as qualifying for a lower or higher pension, as the case may be, that portion only of his service during which he has drawn the maximum pay of the post.

7. These rules will apply with effect from the 1st April 1919 to all officers who retired from civil employ after the 4th August 1914. They will apply to an officer who retired from civil employ before that date if he was recalled during the great war for further civil employment in a qualifying post in India and completed in all three years' service in such a post.

NOTIFICATION.

No. 258 L., dated Calcutta, the 21st January, 1922.—The following Bill was introduced in the Bengal Legislative Council on the 19th January, 1922, and is hereby published for information, together with the Statement of Objects and Reasons annexed thereto :—

THE CALCUTTA IMPROVEMENT (AMENDMENT) BILL, 1922.

A

BILL

further to amend the Calcutta Improvement Act, 1911.

Preamble.

WHEREAS it is expedient further to amend the Calcutta Improvement Act, 1911, in the manner hereinafter appearing, in order to award a sum of fifteen *per cent.* on the market value of land acquired for the Calcutta Improvement Trust in consideration of

Ben. Act V
of 1911.

the compulsory nature of the acquisition, in lieu of the costs hitherto awarded in substitution therefor;

It is hereby enacted as follows:—

Short title.

1. This Act may be called the Calcutta Improvement (Amendment) Act, 1922.

Repeal of sections 2, 6, 7, 8, 9(1) and 12 of the Schedule

2. Sections 2, 6, 7 and 8, section 9, sub-section (1), and section 12 of the Schedule to the Calcutta Improvement Act, 1911, are hereby repealed in respect of all awards made after the commencement of this Act by the Collector under the Land Acquisition Act, 1894, as amended by the Calcutta Improvement Act, 1911, in regard to land acquired for the Calcutta Improvement Trust and in respect of all appeals or proceedings in connection with such awards.

I of 1891.
Ben. Act V
of 1911.

STATEMENT OF OBJECTS AND REASONS.

The abolition of the payment of the usual 15 per cent. *solatium* in the case of land compulsorily acquired by the Calcutta Improvement Trust aroused considerable opposition when the Calcutta Improvement Act was passed. Some years later the Calcutta Improvement Trust, in making proposals to Government for the amendment of the Act of 1911, recommended that the 15 per cent. *solatium* should be restored, and a formal resolution to this effect was moved in the old Legislative Council by Rai Bahadur Radha Charan Pal in 1919. In the Government reply to that resolution it was stated that Government proposed to legislate so as to restore this *solatium* in the case of all street schemes, although not in the case of general improvement schemes, which are ordinarily designed to remedy insanitary conditions produced by the improper use of land. It was, however, ultimately decided by Government that, as the majority of the schemes undertaken by the Calcutta Improvement Trust were actually street improvement schemes, it was desirable that the limitation on the grant of the *solatium*, which had been originally approved, should be removed, and that the provisions of the Land Acquisition Act on this point should be restored in their entirety. In the meantime several other defects in the Act had been revealed as the result of some years' experience, and it was decided to undertake a thorough revision of the Statute, but as the Reforms were shortly to come into operation, it was resolved that the amending Bill, which had been drafted, should be submitted to the Minister, Local Self-Government Department, for his examination. Certain points raised in the larger Bill are still under discussion, and as it is not considered equitable that the privilege of the *solatium* should be any longer withheld from those entitled to it, now that the principle has been conceded, it has been decided to introduce a short amending Bill, which deals merely with this subject, with the intention that the larger Bill should be introduced as early as possible.

*Secretary to the Government of Bengal and
Secretary to the Bengal Legislative Council.*

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS FOR THE PORT OF CALCUTTA FOR THE YEAR 1920-21.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 17TH JANUARY 1922.

RESOLUTION—No. 192 Marine.

READ—

The Administration Report of the Commissioners for the Port of Calcutta for the year 1920-21.

General Features of the Administration.—The year under review completed the 50th year of the life of the Trust, and was marked by an important

change in the administration of the Port by the passing of an amending Act, authorizing the appointment of a whole-time salaried Chairman and a Deputy Chairman in place of a part-time Chairman and a Vice-Chairman. The gross tonnage visiting the port during the year approximated to that of the best pre-war years. The following statistics of traffic show the trade of the port as compared with the previous seven years :—

	1913-14.	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	1920-21.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
I. Net Tonnage of the Port ...	4,236,987	3,714,344	2,967,798	2,801,680	2,094,011	2,292,462	2,941,846	4,017,514
II. Jetties Imports ...	1,186,797	917,975	768,431	686,010	633,693	574,832	713,746	684,990

IV. Docks General Exports ...	1,281,989	920,359	1,034,985	1,185,159	995,112	1,097,562	1,146,479	1,133,719
V. Docks Coal ...	2,017,180	2,633,805	1,610,645	1,994,522	1,614,993	1,343,288	2,264,976	3,046,400

Income.—The income for the year was the highest attained in the history of the Trust, being Rs. 2,66,08,052 against Rs. 2,23,55,614 of the preceding year. The chief increases occurred under the heads Jetties, Rentable lands and buildings, Wet docks and River dues.

The war surcharges were withdrawn from 31st March 1920, but in addition to other measures it was found necessary to impose a special scale of storage or rent charges from April 1920 to ensure the rapid removal of goods and thus to avoid congestion in the transit sheds.

Expenditure.—The total disbursements for the year, including a special appropriation of Rs. 25 lakhs to meet the depreciation of Sinking Fund investments amounted to Rs. 2,51,61,205 as against the revised estimate for the year of Rs. 2,41,91,945 and the actual expenditure of the preceding year of Rs. 2,25,51,875. The actual expenditure appreciably exceeded the revised budget estimates under the following heads :—

	Actual.	Revised estimate.	Increase.
	Rs.	Rs.	Rs.
Control ...	17,37,143	16,69,805	67,338
Jetties ...	21,31,121	20,74,163	56,958
Port ...	13,07,245	11,76,882	1,30,363
Port Approaches ...	14,52,222	12,87,349	1,64,873
Wet Docks ...	51,86,818	48,65,518	3,21,330
Interests and Sinking Fund charges ...	62,60,366	58,39,624	4,20,742
Difference on exchange ...	2,26,213	1,00,000	1,26,213

Jetties.—The tonnage handled at the Jetties was 684,990 tons in 1920-21, as compared with 713,746 tons in 1919-20. The decrease of 28,756 tons was attributable almost entirely to the high proportion of iron and steel and machinery in the cargoes dealt with. There was, however, a very marked increase in the earnings of the Jetties, the amount for the year being Rs. 62,16,693 against Rs. 22,44,027 in the preceding year. The increase was due chiefly to the higher rent charges ; but each berth in use was utilised on average for 347 days during the year compared with 265 days during 1919-20. The unprecedented number of heavy lifts brought out by import steamers greatly reduced the rate of discharge.

Docks.—One thousand one hundred and thirty-three vessels were berthed at the docks during the year under review as against 966 in the previous year. The tonnage of the Docks traffic was 413,357 tons imports and 4,180,119 tons exports, as against 653,066 and 3,411,455. There was a fall in the importations of rice and paddy and Java Sugar and a remarkable increase in the exports of coal.

Inland Vessels Wharves, Budge-Budge.—There was a small decrease in the income from the Inland Vessels Wharves as compared with the previous year mainly due to a diminished traffic in rice and paddy, grain, seeds and betelnuts and in building materials.

One hundred and ninety-five vessels were berthed at Budge-Budge Petroleum Wharf during the year as compared with 150 in the preceding year.

Tea Warehouse.—The trade in tea decreased by about 25 per cent. in comparison with that of last year and the receipts were less by nearly Rs. 1 lakh chiefly under the head of storage charges.

Navigable Channels.—An important feature of the year was the extension of the boundaries of the port proper in a northerly direction from the present limits at Cossipore to Konnagore, while the limits of the navigable river and its approaches were extended north as far as Kalna in the district of Burdwan. It is anticipated that these developments will ensure in the future a more complete and effective control of the river channel. The river channels between the Sandheads and the Port were maintained in a satisfactory condition.

Night Navigation.—Owing to the heavy programme of work the annual overhaul of the gas and channel buoys was not completed by the end of the year, but satisfactory progress was made.

Capital Works.—The chief capital works in progress during the year were :—

1. King George's Dock. The commencement of this work was made and a commemoration stone was laid by His Royal Highness the Duke of Connaught on the 2nd February 1921.

2. Garden Reach riverside berths.

3. Reconstruction of No. 3 Calcutta Jetty.

4. The Rangoon Passenger Shed or Dharmasala, which was completed towards the end of the year. The greater part of the cost of this building was defrayed by Rai Mukhran Kanuria Bahadur.

5. Several important additions were made to the Commissioners' fleet of vessels. Good progress was made with a large new suction dredger named the *Gunga*, and a powerful new tug the *Sir Fredrick Dumayne*, to replace the *Retriever*, was under construction.

Capital Account.—The total liabilities of the Trust on capital account at the close of the year including the outstanding portion of the Government loan and the debenture loans still due for repayment, less the value of the assets of the Sinking Fund, amounted to Rs. 10.42 crores, while the total assets aggregated Rs. 15.38 crores including a sum of Rs. 3.28 crores spent on works in progress.

General.—The amending Act of 1920 providing for a whole-time salaried Chairman which became law in October 1920, was not brought into effect till after the close of the year 1920-21. The Hon'ble Sir Charles Stevenson-Moore, K.C.I.E., C.V.O., I.C.S., vacated the appointment of Chairman on the 6th May 1920 and was succeeded by the Hon'ble Mr. F. J. Monahan, I.C.S., till the 16th December 1920 and then by Mr. D. H. Lees, I.C.S. Mr. S. C. Stuart-Williams continued throughout the year to hold the post of Vice-Chairman.

The Governor in Council desires to thank these gentlemen for their successful administration of the Trust.

By order of the Governor in Council,

H. E. SPRY.

Secretary to the Government of Bengal (offg.).

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Wheat Crop of Bengal, 1921-22.

(NOTE.—On an average of the five years ending 1919-20, the area under wheat in Bengal has represented some 0·4 per cent. of the total area under wheat in India. The ratio of the irrigated wheat acreage to total wheat acreage in (a) British India, and (b) in the territory now reported on, has in the five years ending 1919-20, averaged (a) 42·3 and (b) 16·0 per cent., respectively.)

Explanatory.—Three forecasts of the wheat crop are published. This forecast deals only with the area sown and the general condition of the crop in its early stages.

Acreage.—According to the estimates of the District Officers, the total area sown amounts to 124,800 acres against 114,300 and 116,900 acres reported, respectively, in the corresponding and final forecasts of last year.

Character of the season.—The rainfall in September and October was generally defective throughout the Province, but the moisture left in the soil was sufficient for the preparatory tillage and for the sowings of the crop which commenced generally in the normal time. Since then, complete drought has prevailed and the present condition is reported to be only fair.

INDIAN SERVICE OF ENGINEERS AND ENGINEERING ESTABLISHMENT OF INDIAN STATE RAILWAYS.

REGULATIONS AS TO APPOINTMENT OF ASSISTANT EXECUTIVE ENGINEERS IN 1922.

[*The Secretary of State is unable to give any undertaking that the Regulations will remain unaltered in the future.*]

1. Until further notice the Secretary of State for India in Council will, during each year, make a number of appointments of Assistant Executive Engineers in the Public Works and State Railway Departments of the Government of India.

In making these appointments he will act with the advice of a Selection Committee, including at least one eminent representative of the Engineering profession.

In 1922 it is intended that 11 appointments shall be made.

The Selection Committee will probably sit in May.

2. Applications must be made on a printed form, which may be obtained from the Secretary, Public Works Department, India Office, Whitehall, S.W. 1, and should reach the India Office not later than 1st April.

3. Every European candidate must have been born on or after the 2nd August 1896 and on or before the 1st August 1900.*

An Indian candidate must have attained the age of 21 and not attained the age of 24 years† on the 1st day of July of the year in which he offers himself for appointment, except that in the case of an Indian who has rendered service of the nature defined in Regulation 4, the same maximum age limit as for Europeans will apply.

[N.B.—*Indians must obtain a certificate of age and nationality in the form explained in Appendix II. As the production of this certificate is a necessary condition of appointment, intending candidates are advised to procure it without delay. The certificate should be forwarded to the India Office together with the candidate's form of application or at the earliest subsequent opportunity.*]

4. Every European candidate in 1922, subject to the exception stated below, must have served in His Majesty's Naval, Military or Air Forces during the war for at least one year, or if his service be less than one year, have been discharged on accounts of wounds or sickness resulting from such service.

* The maximum age limit for European candidates will be reduced to 25 years in 1923 and to 23 years in 1924.

† Subject to the exception stated in paragraph 3, the maximum age limit of 24 years for Indian candidates will be maintained for the next year and will be reduced to 23 years in 1924.

In the case of Europeans who have been prevented on adequate grounds from joining His Majesty's Forces, applications to be exceptionally admitted as candidates may be made to the India Office for consideration.

5. Every European candidate must be a British subject and, except as provided in Regulation 6, if he or his father or his mother was not born within His Majesty's Dominions and allegiance, the father must at the time of the candidate's birth have been a British subject and still be (or have continued to be until his death) a British subject. The decision of the Secretary of State in Council, whether a candidate satisfies these conditions, shall be final. A candidate must also be of good moral character and sound bodily health and, in the opinion of the Secretary of State for India in Council, in all respects suitable to hold an appointment in the Indian Public Works Department or State Railway Department.

*6. Indians who, save as hereinafter provided, are British subjects, and are not qualified under Regulation 5, are eligible for appointment and shall be selected to the extent of 10 per cent. of the total number of Assistant Executive Engineers thus recruited, if otherwise duly qualified.

Provided that a ruler or subject of any State in India in respect of whom the Governor-General in Council has made a declaration under section 96A of the Government of India Act, 1915, as amended by section 3 of the Government of India (Amendment) Act, 1916, may be considered eligible.

It is preferred that candidates should have taken a college course and obtained one of the degrees mentioned in Appendix I. They should in addition have had at least one full year's practical experience of Civil Engineering under a qualified civil engineer at the time when they appear before the Selection Committee. Those whose qualifying diploma has been obtained without a college course should have had a full three years of such practical experience.

8. European applicants eligible under Rule 4 who can produce evidence of the above qualifications will be admitted as candidates; others not holding one of the recognised degrees or diplomas must produce evidence—

9. Selected candidates will be required to undergo further training on works in India for a period of at least one year. During this period they will be on probation and their final appointment will be made dependent upon the result of such probation.

10. Candidates must be prepared, if called upon, to attend at the India Office, at their own expense, for a personal interview with the Selection Committee.

11. Candidates will further be required, before final appointment by the Secretary of State in Council, to appear, at their own expense, before the Medical Board at the India Office for examination as to their physical fitness for service in India.

The Regulations governing the physical examination of candidates for the Public Works and State Railway Departments of the Government of India are given in Appendix III.

14. If less than 24 years of age on 1st August 1922, candidates will enter the service as Assistant Executive Engineers on a salary of Rs. 6,300 a year. If above 24 years, they will be credited with service as though they had been appointed in their 24th year. The years of service so credited will subsequently count for purposes of pay and promotion, but not for leave.

APPENDIX III.

REGULATIONS AS TO THE PHYSICAL EXAMINATION OF CANDIDATES FOR APPOINTMENT TO THE PUBLIC WORKS DEPARTMENT OF THE GOVERNMENT OF INDIA.

Note.—These Regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Secretary of State reserves to himself an absolute discretion to reject as unfit any candidate whom he may consider, after hearing the opinion of his medical advisers, to be physically disqualified for the public service; and that his discretion is in no respect limited by these Regulations.

It is not the practice to communicate to candidates who may be reported as physically unfit for service in India the reasons for the Medical Board's opinion.

General Physical Requirements.

1. A candidate must be in good mental and bodily health, and free from any physical defect likely to interfere with efficient performance of duty.

2. In the examination of candidates the Medical Board will apply the following table of correlation of age, height, and chest girth:—

Age.		Height without Shoes	Chest.		
			Girth when expanded	Range of expansion.	
		Inches.	Inches.	Inches.	
21 and upwards	...	62½ and under 65	...	35	2
		65 „ 68	...	35½	2
		68 „ 70	...	36	2
		70 „ 72	...	36½	2½
		72 and upwards	...	37	2½

3. *Measurement of Height.*—The candidate will be placed against the standard with his feet together, and the weight thrown on the heels, and not on the toes or outside of the feet. He will stand erect without rigidity, and with the heels, calves, buttocks, and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be noted in parts of an inch to eighths.

4. *Measurement of Chest.*—The candidate will be made to stand erect with his feet together, and to raise his hands above his head. The tape will be carefully adjusted round the chest, with its posterior upper edge touching the inferior angles of the shoulder blades, and its anterior lower edge the upper part of the nipples. The arms will then be lowered to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to empty his chest of air as much as is possible. This is best done by continuous whistling with the lips as long as sound can be produced. The tape is carefully gathered in during the process, and when the minimum measurement is reached it is recorded. The candidate will then be directed to inflate his chest to its utmost capacity. This maximum measurement will likewise be noted. The girth with the chest fully expanded and the range of expansion between the minimum and the maximum will then be recorded.

5. The hearing must be good.

6. The speech without impediment.

7. The teeth in good order, *i.e.*, decayed or broken teeth must be properly stopped or crowned, and deficient teeth replaced by artificial teeth where necessary for effective mastication.

8. The chest must be well formed, the lungs and heart sound.

9. Rupture, hydrocele, varicocele, varicose veins in a severe degree, or other condition likely to cause inefficiency will disqualify a candidate, unless such condition is cured by operation.

10. The limbs, feet, and toes must be well formed and developed, with free and perfect motion of all the joints.

11. A candidate must have no congenital malformation or defect likely to interfere with efficiency.

12. A candidate must not be the subject of chronic skin disease.

13. Evidence of previous acute or chronic disease pointing to an impaired constitution will disqualify.

Candidates may, if they wish it, undergo a preliminary examination by the Medical Board, which meets at the India Office every Tuesday, under the following conditions :—

(a) Applications must be addressed to the Under-Secretary of State, India Office, Whitehall, London, accompanied by a fee of two guineas, and a statement as to the particular appointment which the candidate desire to obtain.

(b) Candidates must pay their travelling expenses.

(c) Candidates considered to be unfit by the Medical Board at this preliminary examination are not bound to accept its opinion, but may, *at their own risk*, continue their studies, with the knowledge that they will have to submit themselves for a final medical examination by the Medical Board, prior to the examination, or to their appointment.

(d) On the other hand, it must be distinctly understood that the preliminary examination by the Medical Board is held solely for the candidate's information and that, if after that examination he is reported to be apparently fit, he has not on that account any claim to be accepted as physically fit when he presents himself for the final medical examination, upon which alone his acceptance or rejection will depend. Candidates may be considered fit for the service at the preliminary examination, but may be found at the final examination to be unfit, either on account of some physical defect which did not exist or passed undetected at the preliminary examination, or for other reasons.

REGULATIONS AS TO THE STANDARD OF VISION.

1. If myopia in one or both eyes exists, a candidate may be passed provided the ametropia does not exceed 3.5 D, and if, with correcting glasses not exceeding 3.5 D, the acuteness of vision in one eye equals $\frac{5}{6}$ and in the other $\frac{6}{6}$, there being normal range of accommodation with the glasses.

2. Myopic astigmatism does not disqualify a candidate, provided the lens, or the combined spherical and cylindrical lenses, required to correct the error of refraction does not exceed 3.5 D; the acuteness of vision in one eye, when corrected, being equal to $\frac{5}{6}$, and in the other $\frac{6}{6}$, together with normal range of accommodation with the correcting glasses, there being no evidence of progressive disease in the choroid or retina.

3. A candidate having total hypermetropia not exceeding 4 D is not disqualified, provided the sight in one eye (when under the influence of atropine) equals $\frac{5}{6}$, and in the other eye equals $\frac{6}{6}$, with + 4D glasses, or any lower power.

4. Hypermetropic astigmatism does not disqualify, provided the lens or combined lenses required to cover the error of refraction do not exceed 4 D, and that the sight of one eye equals $\frac{5}{6}$, and the other $\frac{6}{6}$, with or without such lens or lenses.

5. A candidate having a defect of vision arising from nebula of the cornea is disqualified if the sight of one eye be less than $\frac{1}{12}$. In such a case the better eye must be emmetropic. Defects of vision arising from pathological or other changes in the deeper structures of either eye, which are not referred to in these rules, may exclude a candidate.

6. Squint or any morbid condition, subject to the risk of aggravation or recurrence, in either eye, may cause the rejection of a candidate. Any imperfection of the colour sense is a disqualification for appointment to the engineering branch of the Railway Department. In other cases the existence of imperfection of colour sense will be noted on the candidate's papers.

FOR ALL APPOINTMENTS UNDER THE INDIAN GOVERNMENT A DECLARATION,

APPENDIX V. (*See para. 17 of the Regulations.*)

NOTE.—This Appendix is merely intended to show the principal leave rules in the Fundamental Rules and the Pension Rules in the Civil Service Regulations at present applicable to Engineers appointed to the Indian Services from the United Kingdom without going into minute details, and does not profess to deal with every case that may arise. The rules are subject to alteration, and any disputed question must be decided with reference to the authorised text of the Fundamental Rules or Civil Service Regulations for the time being.

LEAVE.

Leave is calculated in terms of "leave on average pay," and the amount of "leave on average pay" for which an officer is eligible is five-twenty-seconds of the period spent on duty.

Subject to certain maxima and minima, an officer may draw, at his option, leave salary equal to the average pay of the last 12 months of completed duty or to half such average pay. All leave on average pay and half the period on half average pay is counted against the leave earned. An officer may take his leave on average pay, on half average pay, or on a combination of the two, provided that his continuous absence from duty does not exceed 28 months, and that the amount of leave taken on average pay does not exceed eight months at any one time. The maximum amount of leave admissible during an officer's career is the equivalent of leave on average pay for three years plus one-eleventh of the period spent on duty, of which not more than one year plus one-eleventh of the period spent on duty may actually consist of leave on average pay. Leave not due and carrying half average pay may be granted on medical certificate, and, within certain limits, for other reasons, but an officer will not again commence to earn leave until the expiration of a fresh period of duty sufficient to earn a credit of leave equal to the leave he has taken before it was due. After 28 months' absence from duty an officer draws quarter average salary, subject to certain maxima and minima.

Leave salary is ordinarily payable in rupees if the officer spends his leave in India or Ceylon, and in sterling if he spends it elsewhere. The rate of exchange for the conversion of leave salary is prescribed from time to time by the Secretary of State.

It should be noted that leave can never be claimed as of right, but is given or refused at the discretion of Government.

PENSIONS.

13. The following is a summary of the pension rules applicable to Engineers appointed to the Indian Services by the Secretary of State from the United Kingdom.

Ordinary Pensions.

14. Subject to the absolute right of the Government of India to decline to permit any officer to retire before reaching the age for superannuation, should it be necessary in the public interest to retain his services, officers will be allowed to retire optionally after 20 or more years' service.

15. Retirement is ordinarily required at the age of 55 years, but for special reasons an officer is sometimes retained after attaining that age.

16. An officer becomes eligible for full retiring pension on completing 30 years' qualifying service:—

17. If before completing this period of service an officer is permitted to retire voluntarily after completion of 20 or more years' qualifying service

(paragraph 14) or is compelled to retire on attaining the age of 55 (paragraph 15), he will be eligible for pension on the following scale:—

Years of Completed Service.	Maximum Limit of Pension.
	Rs.
20	4,000 per annum.
25	5,000 „
26	5,200 „
27	5,400 „
28	5,600 „
29	5,800 „
30	6,000 „

18. Government may retire any officer after he has completed 25 years' service without giving reasons, and without any claim for compensation in addition to pension, and in that event the pension admissible to him will ordinarily be regulated on a scale not exceeding that laid down above. Government also reserves the general power to reduce the pension ordinarily admissible in all cases where an officer's service has been unsatisfactory.

19. An officer who is compelled to retire through ill-health not occasioned by irregular or intemperate habits will be eligible for gratuity or pension as follows:—

(a) After a service of less than 10 years a gratuity not exceeding (except in special cases and under the orders of the Government of India, up to a maximum of 12 months' emoluments) one month's emoluments for each completed year of service. If the emoluments of the officer have been reduced during the last three years of his service, otherwise than as a penalty, average emoluments may, at the discretion of the authority which has power to sanction the gratuity, be substituted for emoluments.

(b) After a service of not less than 10 years, a pension not exceeding the following amounts:—

Years of Completed Service.	Scale of Pension.	Maximum.
		Rs.
10	10 sixtieths of average emoluments	2,000 per annum

28	30 " "	5,600 "
29	30 " "	5,800 "
30 and above	30 " "	6,000 "

Additional Pensions.

20. The Government of India have classified certain high appointments into two grades, the lower comprising those posts which involve high but intermediate responsibility, the higher consisting of those which require a marked degree of independent administrative and professional capacity. Officers who have held appointments listed in the lower grade will be entitled to an additional pension at the rate of Rs. 300 per year for each completed year of effective service in any appointment included in that grade provided that no officer may draw an additional pension in excess of Rs. 1,500 in respect of service classed in the lower grade. Officers who have held appointments listed in the upper grade will be entitled to an additional pension at the rate of Rs. 500 for each completed year of effective service rendered in any appointment included in that grade, provided that no officer may draw an additional pension in excess of Rs. 2,500 in respect of service rendered in the lower and upper grades combined or in the upper grade alone.

21. These additional pensions will be awarded only to officers who have given proof of special energy and efficiency, and will be subject to the condition that an officer must not retire voluntarily before the age of 55 with less than 28 years' service.

The upper grade includes the Secretary to the Government of India, Public Works Department, the Inspector-General of Irrigation, Chief Engineers of the Indian Service of Engineers, Agents of State Railways (if in pensionable service) and Chief Engineers, Railways.

The lower grade includes Superintending Engineers, Indian Service of Engineers, Deputy Secretary to the Government of India, Public Works Department, Deputy Agents of State Railways (if in pensionable service) and the Secretary, Railway Board (if in pensionable service).

PROVIDENT FUND.

22. A general Provident Fund, to which contribution is compulsory, has also been established on the following basis:—

- (1) The contribution is compulsory up to 6½ per cent. on salaries, with voluntary contributions of not more than a further 9½ per cent. Subscriptions on leave of any kind are optional.
- (2) Compound interest on such payments is annually credited by Government to each officer subscribing.
- (3) The sum which thus accumulates to the credit of an officer is his absolute property, subject to the rules of the Fund, and is handed over to him, unconditionally, on quitting the Service: or, in the event of his death before retirement, to his legal representatives or such other person or persons as, under and subject to the rules of the Fund for the time being in force, may be entitled thereto.

Provided that the aggregate capital amount of the loans the principal or interest of which is guaranteed under this section shall not exceed the sum of twenty-five million pounds.

Chief Secretary
to the Government of Bengal.

No. A-74.

Delhi, the 12th January 1922.

RESOLUTION.

IN the year 1908 an International Electro-technical Commission was formed with its headquarters in London for the purpose of carrying out the following resolution of the Chamber of Government Delegates at the International Electrical Congress of St. Louis in September 1904 :—

“ That steps should be taken to secure the co-operation of the Technical Societies of the world by the appointment of a representative Commission to consider the question of the standardisation of the Nomenclature and Ratings of Electrical Apparatus and Machinery.”

2. Under the Status of the Commission each self-governing country desiring to join the Commission is authorised to form an Electro-technical Committee for its own country. The question of constituting a National Committee for India was considered by the Government of India in 1910. It was, however, decided to postpone its organization as the manufacture of electrical machinery in India was at that time on too small a scale to justify the formation of a Committee. The Government of India have, nevertheless, been represented at the meetings of the Commission and have subscribed regularly to its funds. Although little further progress has yet been made in the actual manufacture of electrical machinery in this country, the Government of India, after consultation with the more important firms interested in electrical matters in India, are of opinion that, in view of the large increase which has taken place in recent years in the sale and use of electrical machinery in this country, the time has now arrived when a local committee should be formed for the purpose of discussing points of interest specially relating to India, of forwarding to the Commission any resolutions which it may frame on the subject and, generally, of performing the functions of a National Committee.

3. According to the Statutes of the International Electro-technical Commission committees should be formed in each country by technical societies which deal with electrical engineering, either exclusively or in conjunction with other technical subjects, provided that such societies have been in existence for at least three years. In the absence of such technical societies a committee may be appointed by the Government. The Government of India are of opinion that the appointment of a National Committee may in the future most suitably be entrusted to the recently constituted Institution of Engineers (India), but as it was constituted as recently as the 13th September 1920 it will not possess the necessary authority until the 13th September 1923. For the intervening period the Government of India have therefore decided to constitute a National Electro-technical Committee for India under paragraph 3 of the Statutes of the Commission. The following gentlemen will form the first committee :—

- (1) A. C. Coubrough, Esq., C.B.E. (of Messrs Mather and Platt, Limited, Calcutta).
- (2) A. Cochran, Esq., C.B.E., M.L.C., M.I.N.A., M.I.E. (India), A.M.I.E.S., (of Messrs, Burn and Company, Calcutta).
- (3) C. D. M. Hindley, Esq., M.A. (Cantab.), Chairman, Port Trust Calcutta.

4. The Committee will choose its own President and appoint a Secretary and proceed with its work in accordance with the Statutes of the International Electro-technical Commission. The subscription hitherto paid by the Government of India as a subvention to the Commission and towards the cost of its publication will in future be paid by the Committee to which the Government of India will, until further orders, make an annual grant of £130.

Ordered that a copy of this resolution be forwarded to all Local Governments and Administrations; to all departments of the Government of India; and to the members of the Committee; and that the resolution be published in the Supplement to the *Gazette of India*.

Secretary to the Government of India.

STATEMENT OF OBJECTS AND REASONS.

The object of this Bill is to provide additional revenues for the province of Bengal in order to remove part of the existing deficit in the provincial revenues. It is proposed to effect this by varying the rates of stamp duties as in the Bill.

Notes on clauses.

Clauses 1 and 2.—These clauses introduce the provisions of the Bill into Bengal and provide for the amendment of the Indian Stamp Act, 1899, by the remaining provisions of the Bill.

Clauses 3 and 5 are consequential on clause 4.

Clause 4 applies generally the duties indicated in Schedule IA to the instruments set forth in this clause, that is to say, to instruments which become chargeable with the rates of duty mentioned in Schedule IA by reason of their inclusion in that Schedule combined with their execution, negotiation or receipt in Bengal.

Clause 6 provides that, where duty under Schedule I has been chargeable in another part of British India on an instrument, which later becomes liable to the payment of the Bengal duty, the duty to be paid in respect of such instrument under this Bill shall be the Bengal duty as set forth in Schedule IA less the amount of duty already paid elsewhere in British India. This principle is applied to instruments on which the full duty chargeable under Schedule I has already been paid, and also to instruments on which such duty should have been but has not been paid. The three months limit to endorsements, provided in clause (b) of the proviso to sub-section (3) of section 32, is applied to all instruments so chargeable, the said instruments being otherwise treated as instruments executed out of British India and received into British India for the first time at the time when the Bengal duty became chargeable upon them, and being exempted from the severer provisions contained in clause (a) of the said proviso.

Clause 7 makes formal alterations in order to apply the provisions of sections 23A, 24 and 29 to the corresponding instruments indicated in Schedule IA.

Clause 8 introduces Schedule IA, which contains the substantive provisions as to the amount of duty chargeable in Bengal on the various kinds of instruments which fall within the scope of the new proviso to section 3.

This Schedule deals with all the classes of instruments, mentioned as chargeable with duty in Schedule I, except the following:—

Acknowledgement (No. 1) Bills of Exchange (No. 13), Certificate (No. 19), Cheque (No. 21), Delivery Order in respect of goods (No. 28), Letter of allotment of shares (No. 36), Letter of credit (No. 37), Policy of Insurance (No. 47), Promissory Note (No. 49), Proxy (No. 52), Receipt (No. 53) and Shipping Order (No. 60), in regard to which instruments all India legislation has been suggested to the Government of India.

RESOLUTION ON THE REPORT ON THE WORKING OF THE CO-OPERATIVE SOCIETIES IN BENGAL FOR THE YEAR ENDING 30TH JUNE 1921.

GOVERNMENT OF BENGAL.

DEPARTMENT OF AGRICULTURE AND INDUSTRIES.

Co-operative.

CALCUTTA, THE 30TH JANUARY 1922.

RESOLUTION—No. 461.

READ—

The report on the working of the Co-operative Societies in Bengal for the year ending 30th June 1921.

The principal administrative change of the year under report was the transfer of the control of the Co-operative Department from the Revenue Department of Government to the Ministry of Agriculture and Public Works

on the inauguration of the Reformed Government in January 1921. Mr. Thorp officiated as Registrar until the return from leave of Mr. Donovan, the permanent Registrar, in November 1920. During the year the Secretary of State sanctioned the appointment of an Assistant Registrar for each division. Four of these have already been appointed and the fifth will be appointed as soon as funds are available. Proposals for the re-organization of the department and for placing it on a permanent footing were submitted to Government towards the close of the year and are now under consideration.

2. The total number of societies increased from 5,408 at the beginning of the year to 6,366 at its close. The progress has not been so great as in the previous year when the number of societies increased by 1,152. There was a persistent demand for new societies, but the Registrar, recognizing the need for caution in regard to new commitments, found it necessary to limit the rate of expansion. In the two years ending 30th June 1921, the total increase in the number of societies has been 50 per cent. Neither of these years could be classed as prosperous, and the second was certainly a year of grave trade depression, financial difficulties and serious political and economic disturbances. In these circumstances, the Hon'ble Minister agrees with the Registrar that the recorded progress was the maximum consistent with financial security and the maintenance of adequate supervision. The total working capital of the societies has risen from Rs. 2,82,00,000 to Rs. 3,33,00,000. Of this sum the societies and their members provide over 40 per cent. Thus, while the capital employed is steadily increasing, the proportion contributed from outside sources is decreasing year by year, and the Hon'ble Minister regards this as a very encouraging feature. The number of members in the societies has risen from 217,175 to 242,085 in the year under report. The increase in the number of societies is thus 17.7 per cent. and in the working capital 17.9 per cent., while the increase in the number of members is only 11.4 per cent. The Registrar, however, points out that the membership of a society at the time of its registration and for a year or two afterwards is generally small. The large number of new societies has thus considerably reduced the average number of members. It is satisfactory that the number of fresh cases of liquidation was only 63, or about 1 per cent. of the total number of societies in existence.

3. Agricultural Credit Societies constitute about 90 per cent. of the total number and their working capital amounted to Rs. 1,22,62,000 as compared to Rs. 1,04,08,000 in 1919-20. The share capital paid up in these societies rose during the year from 1.53 to 3.02 lakhs, and deposits by members increased from 5.76 to 6.27 lakhs.

Central Banks have increased in number from 64 to 71, and their working capital rose from Rs. 1,04,04,895 to Rs. 1,21,22,554. About two lakhs of this, however, is a fictitious increase being the amount due to the Faridpur Central Bank by the Nurgpur Central Bank. The actual increase in capital is thus about 15 lakhs. There was a considerable falling off in collections during the year under report. This was due to the unsatisfactory agricultural conditions and the economic depression of the year. As a result provincial and central banks were compelled to exercise the greatest caution in regard to new commitments, and the amount issued in fresh loans fell from 56.45 lakhs to 44.13 lakhs. The loans and deposits received by central banks also showed a slight decrease. This was due not to any weakening of public confidence but to a general shortage of money and the competitive rates offered by other borrowers. The total liquid resources of the central banks at the close of the year were 9.78 lakhs and the Registrar points out that this is a very low cover for deposits of Rs. 42,00,000 maturing in the following twelve months. Of these 42 lakhs, however, 24 lakhs are held by central banks from the Provincial Co-operative Federation. Taking the Federation and the Central Banks together, more than 50 per cent. of the deposits received from the public which mature in the next twelve months are covered by liquid resources. The Hon'ble Minister agrees with the Registrar that the position is quite safe, but he desires to impress on the Central Banks the inadvisability of relying too much on the Federation and letting their own liquid resources run too low.

The Bengal Provincial Co-operative Federation is in a very satisfactory position. Although its rates are sometimes less and never more than the rates offered by Government and public bodies, it received from the public fresh deposits of over five lakhs of rupees during the year under report, compared to less than one lakh of rupees in the previous year. It has followed a careful and cautious policy and this has enabled it to retain the confidence of depositors.

4. The Bengal Co-operative Organization Society, which is doing useful work as a central bureau of information and advice on co-operative matters, devoted particular attention to the solution of problems peculiar to Calcutta. As a result of the activities of its Housing Committee, the organization of a co-operative housing society has now become a matter of practical politics. The Stores Sub-Committee is engaged in an attempt to organize co-operative coal supply in Calcutta. The departmental museum has been instrumental in bringing the work of the industrial societies to the notice of the public and securing orders for them.

5. There are now eleven Agricultural Purchase and Purchase and Sale Societies as compared with seven in the previous year. On the whole, these societies have shown satisfactory progress. Their growth is in no way forced. The Co-operative Department are well aware of the general incapacity of cultivators to manage the business affairs of these societies and they do not too readily encourage their organisation. In spite of this, cultivators have insisted on making an attempt in different districts. This development is satisfactory inasmuch as it proves that these cultivators no longer regard co-operation as an easy means of getting cheap loans, but understand and appreciate the true principles of the co-operative movement. The Khepupara Supply and Sale Society has been a conspicuous success. It now serves nearly 3,000 families and is rapidly expanding its business. It has recently erected, at a cost of Rs. 18,000, a godown capable of storing 40,000 maunds of paddy which will enable the members, who have hitherto been forced to sell their produce at a sacrifice for want of storage room, to wait for a favourable market. The co-operative store at Naogaon is another successful institution. Its business is rapidly developing and it has now two shops in the town of Naogaon; it has also started a printing press which is executing orders for co-operative societies in every part of the province. The milk societies in the Barasat subdivision unfortunately received a serious setback owing to circumstances which might have been avoided by timely action. When the situation was realized prompt measures were taken to retrieve the situation and the crisis is now past. The Naogaon Ganja Cultivators' Co-operative Society also passed through a severe crisis during the year. An attempt to spread the non-co-operation movement in the area completely failed, but internal dissensions for which the agitators were to some extent responsible, considerably hampered the development of its work. By the end of the year, however, these differences were composed, and there is every reason to hope that this society will now continue its former prosperous career.

The number of non-agricultural societies increased from 360 in the previous year to 438 in the year under report. Of these 148 are credit societies with a working capital of Rs. 55,82,000. Taken as a whole, the returns of these societies are most satisfactory. The Calcutta Credit Societies, 33 in number, are a sound financial group and afford great assistance to 23,000 middle class employees in Calcutta offices. An interesting feature of the Chittagong group of societies is the fact that punctuality in repayment is encouraged by allowing a rebate of interest on loans repaid on the due date, whereas in other districts penalties are imposed for unpunctuality. The system in force at Chittagong is in the true spirit of co-operation and it is satisfactory to find that it has proved more efficacious than the system of penalising unpunctuality.

The number of non-agricultural supply and sale societies has risen from 18 to 90 in two years. This large increase was due to economic causes. High prices and profiteering induced people of the middle classes to attempt co-operative distribution. It was found, however, that many of these

societies were working on wrong lines. The true spirit of co-operation was absent; members were disloyal, credit was too freely given, and reckless attempts were made to under-sell the market. A halt was therefore called in the organisation of new societies and the officers of the department devoted their attention to the improvement of existing societies. Some improvement has already been effected, but many of the societies are so bad that the only course is to close them. The Registrar points out that these failures have their value and that the experience gained will lead to an advance on sounder lines.

The number of Weavers' Societies has increased to 117, but it is only in Bankura that anything like an outstanding success has been achieved. Owing to the prevailing economic conditions, the turn-over of the Bankura Industrial Co-operative Union was considerably smaller than in the preceding year, but in other respects the union made distinct progress. The societies have improved and bad workers and bad societies have been replaced by good workers and good societies. The quality of the work has greatly improved and cloth is now woven at Bankura which the weavers could not have attempted to make two or three years ago. Financially too the union is much stronger. The paid-up share capital exceeds Rs. 10,000 and nearly half of it belongs to the weavers themselves.

6. An important feature of the situation is the increasing interest and sympathy shown by the public towards the co-operative movement in practically every part of the province. In particular, the interest of the zamindars in the movement has shown a marked increase and many of them have rendered valuable assistance, both financially and by propaganda. To these and to numerous other gentlemen, official and non-official, to whom the department is indebted for assistance, the thanks of the Hon'ble Minister are due.

7. This is the last report on the working of the Co-operative Department which will be submitted by Mr. Donovan. He has been Registrar of Co-operative Societies since June 1917 and has relinquished charge of his office since the close of the year under report. The Hon'ble Minister takes this opportunity of expressing his thanks to Mr. Donovan for the untiring zeal and energy with which he discharged his duties, and of congratulating him on the great stride which the movement made during his tenure of office. The Hon'ble Minister notes with pleasure the good work of the staff which the Registrar has brought to the notice of Government.

Secretary to the Government of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.**Final Forecast of the Sugarcane Crop of Bengal, 1921-22.**

(Note.—On an average of the five years ending 1919-20, the area under sugarcane in Bengal has represented some 8·4 per cent. of the total area under sugarcane in British India.

Character of the season.—As reported in the second forecast lack of soil moisture at the beginning and insufficient rainfall later on during the months of May and June were generally unfavourable to the planting and growth of the crop in the western districts while in the rest of the Presidency the crop was not much affected. Since then, however, favourable conditions generally prevailed from July to September and the crop improved greatly in spite of some damage caused by heavy rainfall and flood in certain districts. Subsequently drought since October has tended somewhat to spoil what would otherwise have been a fairly favourable season.

Acreeage.—The total area planted with sugarcane for the Province is estimated at 220,900 acres this year against 218,800 acres last year.

Outturn.—From the Appendix I attached to the report, it will be seen that the district of Darjeeling reports a bumper crop; two districts (namely Rangpur and Noakhali) report a normal crop; twenty districts a crop varying from 75 to 92 per cent. and three districts a crop as low as 58 per cent. each. The district of the Chittagong Hill Tracts reports a crop as low as 58 per cent.

According to the above estimates, the average outturn of the crop for the Province works out at 82 per cent. of the normal against 88 per cent. last year.

Taking 36 maunds as the normal rate of cane gur per acre the gross outturn for the Province is estimated at 239,500 tons this year against 254,600 tons last year.

Other sources of gur.—The total quantity of gur likely to be obtained from date palm juice is estimated at 119,800 tons this year against 124,100 tons last year.

The total quantity of gur for the Province from all sources is thus estimated at 359,300 tons against 378,700 tons last year.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT FOR THE YEAR ENDING 31st MARCH 1921.

NOTIFICATION.

Minister in charge : The Hon'ble Sir S. N. Banarji, Kt.
No. 424M.—The 24th January 1922.—The following is published for general information, under section 41 of the Licensed Warehouse and Fire Brigade Act, 1893 (Bengal Act I of 1893).

S. W. GOODE,
Secretary to the Government of Bengal (offg.).

No. F. B.-552—1183, dated Calcutta, the 18th October 1921.

From—R. CLARKE, Esq., C.I.E., Commissioner of Police, Calcutta,

To—The Secretary to the Government of Bengal, Local Self-Government Department.

In accordance with paragraph 41, section 2 of the Licensed Warehouse and Fire Brigade Act (I of 1893), I have the honour to submit herewith the report on the working of the Fire Brigade and Ambulance Department for the year ending the 31st March 1921.

No. F. B. 552—1118, dated Calcutta, the 21st September 1921.

From—CAPTAIN BERNARD A. WESTBROOK, Chief Officer, Fire Brigade, Calcutta,

To—The Secretary to the Government of Bengal, Local Self-Government and Education Department.

(Through R. Clarke, Esq., C.I.E., Commissioner of Police, Calcutta.)

I have the honour to present the following report on the working of the Calcutta Fire Brigade for the year ending the 31st March 1921.

2. I returned from leave and resumed charge of the Fire Brigade on the 4th December 1920. During my absence, Second Officer Jarrett officiated.

3. **Financial statement.**—The statement of the receipts and expenditure and payments made by the municipalities within the jurisdiction of the Fire Brigade Act, I of 1893, is given in Appendix I.

4. **Fires, etc.**—During the year under review the Fire Brigade received calls for a total number of 614 fires, or supposed fires, being an increase of 64 over the previous year. The above is classified as under—

Fires	460
False alarms	149
Calls for special service	5

It is unsatisfactory to note that no less than 96 of the above false alarms were wilful. In two instances the offenders were arrested by the police. The Fire Alarm system has been of considerable utility, and undoubtedly many serious fires have been averted owing to this direct and rapid means of communication with the Brigade.

On two	days	7 fires or supposed fires occurred	...	14
On four	„ 6	ditto ditto	...	24
On seven	„ 5	ditto ditto	...	35
On twenty-six	„ 4	ditto ditto	...	104
On fifty-five	„ 3	ditto ditto	...	165
On eighty-five	„ 2	ditto ditto	...	170
On one hundred and two	„ 1	ditto ditto	...	102
Total				614

The actual number of calls received during the year was 968 as compared with 811 in the previous year. This figure includes instances where more than one call was received for the same fire. Forty-eight fires occurred in the premises licensed under the Licensed Warehouse and Fire Brigade Act, I of 1893, as against 38 in the preceding year. The nature of the trades requiring licenses under this Act are enumerated in Appendix XVII.

5. **Fire loss.**—The total damage caused by fire and water during the year under review is estimated at Rs. 23,57,085, being a decrease of Rs. 4,55,937 in the last year, and an increase of Rs. 11,31,761 over the average of the past ten years. This comparatively heavy fire loss is chiefly due to the abnormal number of fires in the jute areas. It is satisfactory to note that the average damage per fire was Rs. 3,839 as compared with Rs. 5,450 for the past ten years.

6. The following summaries are given in the appendices :—

	Appendix
Districts in which fires or supposed fires occurred ...	III
The number of fires on every day and month throughout ...	IV
Daily and hourly summary of fires or supposed fires ...	V
Damage caused by fire, etc., in various districts ...	VI
Classification of fires and calls ...	VII
Means by which fires were extinguished ...	VIII
Short reports of fires of Rs. 1,000 damage and over ...	IX
Causes of fires, and trades, etc., affected ...	XV
Comparative statement for the past ten years ...	XVIII

7. **Appliances.**—Appendix X shows the distribution of the principal appliances in commission by the Fire Brigade, and Appendix XI gives the number of times each appliance has been turned out in response to fire calls. It is estimated that motor appliances travelled 5,596 miles and horse drawn appliances 190 miles during the year in responding to and returning from calls. A new motor fire engine from Messrs. Leyland and Company was received on 20th December 1920. Considerable difficulty has been experienced with delivery hose throughout the year. Owing to the extra cost and low rate of exchange the budget heading in this respect has had to be considerably exceeded. Frequently at jute fires a large quantity of hose is in use for periods often exceeding a week, and experience has shown that such conditions have a remarkably bad effect on the hose and considerably more so than would be normally anticipated.

8. **Fire stations.**—Appendix XII gives the number of times each Fire Station has been turned out in response to fire calls, together with monthly figures. The headquarters of the Fire Brigade is still located in premises rented from the Samavaya Corporation, Limited, in Corporation Place and no further steps have been taken to secure a suitable site for the erection of permanent headquarters. A high rent is paid for the present buildings which are not suitable for the purposes required, and undoubtedly the efficiency of the Brigade can be improved by the provision of suitable headquarters with proper workshops, drill yard and convenient quarters for the men. I am pleased to be able to report that progress has been made in building the District Fire Station in Central Avenue. This station will have accommodation for five appliances and will protect a very important and congested area. It is anticipated that the station will be occupied about the beginning of October 1921. Plans and estimates have been prepared for extending Chitpur Station, and provision for this is being made in the budget of 1921-22. It is very important that the station should be put on a footing commensurate with the many serious fire risks it protects. A District Fire Station is urgently needed at the Kidderpore Docks, and smaller fire stations are required at Burra Bazar and Sova Bazar. The small fire stations at Watgunge and Palmer's Bridge have been vacated owing to the increased number of motor appliances employed, and the men and appliances have been distributed amongst the various stations of the Brigade.

9. **Staff.**—The strength of the Fire Brigade was 222 at the beginning of the year, and under Government order No. 2902M., dated the 30th November 1920, the number of the European firemen has been reduced from 7 to 4 from 1st December 1920. The actual strength of the Brigade was 219 at the close of the year. The curtailed European strength is barely sufficient to cope efficiently with the large amount of work involved, and does not provide a sufficient margin for sickness, injuries or leave.

10. Fatalities and Accidents.—Short details of fires and calls involving loss of life and accidents are given in Appendix XIV. I regret to note that during the year (1) Engineer Bishop met with an accident which resulted in the loss of his right eye and (2) Khalasi Dost Mahommed Kuan accidentally slipped and fell from the motor engine. He sustained serious injuries and was admitted to hospital, where he subsequently died. Government sanctioned a pension of Rs 6 per month to his wife (Government order No. 1188L.G., dated 10th February 1921). The total number of fatalities during the year was 29 as compared with 46 in the previous year. Of these 3 were cases of suicide by burning. First-aid was rendered in almost all cases of injury by the Fire Brigade, and injured persons were conveyed to hospital.

11. Horses.—The number of the horses was the same as last year.

12. Water Supply.—For several years past the extremely serious conditions due to inadequate water supply had been commented upon in the annual report, and I regret to say that no action has been taken by the municipalities concerned. The conditions are worse now than previously owing to many tanks having been filled up on sanitary grounds and for prevention of mosquitoes. Calcutta has a system of unfiltered water mains which is used for fire extinguishing. Numerous complaints have been submitted to the Water-works Department regarding the inadequacy of the water supply, in reply to which the Fire Department is officially informed that no improvement can be expected until a new water system is completed. I understand that new scheme will take at least five years to instal, and the present deterioration of water supply will continue, probably more rapidly than hitherto, due to extension of mains, more connections, wear and tear of machinery, etc. Unless immediate steps are taken to improve matters very serious fires must inevitably occur. An estimate was put up by the Water-works Executive Engineer to instal seventy-five 5" hydrants on suitable mains which will enable fire engines to obtain a better supply, but this estimate was cut down to twenty-five 5" hydrants. In a city such as Calcutta this number is totally inadequate.

Regarding Howrah and Chitpur the dangerous state of affairs was specially pointed out and emphasized by the Commissioner of Police, who said in the covering letter to the Government of Bengal with the annual report of the Fire Brigade for the year ending 30th March 1920—"The question of the water supply in the districts of Howrah and Chitpur demands immediate attention as these areas comprise very dangerous fire risks." I regret to say that not only has nothing been done to improve the supply, but conditions are even worse now as above noted, and the various areas referred to are becoming more congested with warehouses, etc. Repeated representations have been made to these municipalities, and the following is an extract from a letter received from Howrah :—

"With reference to your letter No. F. B. 288-299, dated the 25th February last, on the subject of water supply for fire extinguishing purposes, I have the honour to inform you that the scheme for effective water supply in the locality appears to be too costly to permit this municipality to meet at the present moment, and mill owners who are directly interested in them have refused to pay any moiety of the cost of the scheme."

It is no uncommon occurrence for as many as 300 lengths of hose to be used at big fires owing to the distance the water is away from the risks. This is a source of considerable expense to the Fire Brigade, and does not permit of efficient working. The comparative freedom from very serious fires appears to have created an atmosphere of false security. It is hoped that the question of water supplies will receive the urgent attention its importance demands.

13. Fire Float.—I am glad to be able to report that an order has been placed by the Commissioners for the Port of Calcutta for a new fire float, and delivery is expected about the end of the present year. This vessel will pump about 4,000 gallons per minute and will be a great acquisition, especially as practically the whole of the serious fire risks in Chitpur and Howrah have to rely upon the river for water supply for fire extinguishing.

The present fire float, which consists of a hopper barge with a land steam fire engine on it, is obsolete and incapable of performing the duties required of it. It is maintained by the Commissioners for the Port of Calcutta, and is under the direction of the Fire Brigade at fires.

14. Street Fire Alarms, Telephones and Electrical Communications.—The means by which fire calls have been transmitted to the Fire Brigade during the year are shown in Appendix II. Appendix XVI is a list showing the positions of the Street Fire Alarms in commission. I regret to have to report a considerable increase in the number of false alarms both wilful and due to electrical defects. The following alterations have been made in the locations of the Street Fire Alarms :—

Lower Circular Road and Chowringhee to in front of Atlas Jute Press, Chitpur.

Barrackpore Trunk Road to near entrance to Union Jute Press.

Majerhat Bridge at Diamond Harbour Road to at the corner of Chitpur Ghat Street and Turner Road.

Gun Foundry Road to opposite Bengal Hydraulic Press near Gun Foundry Road.

It is hoped that false alarms due to electrical defects will soon be more or less eliminated, as the Bengal Telephone Company report that as soon as the various fire alarm lines are transferred from the old exchange to the new exchange such defects will be remedied. Power to punish adequately offenders who give wilful false alarms is being requested from Government. The present punishments have no deterrent effect. I take the opportunity of thanking the Bengal Telephone Company for the interest they continue to display in all matter appertaining to Fire Brigade work and for the prompt attention given to all defects on fire lines.

15. Inspection Department, theatres and places of public amusement.—Considerable progress has been made during the year in respect to safeguarding the public in places of amusement. Experience has shown that there has been overlapping of different authorities in the matter—a factor which has a deterrent effect on the enforcement of the laws—and it seems advisable for the control of theatres, etc., to be vested in one authority. The fines imposed in the Municipal Court on theatres for breach of the theatre by-laws during the year amounted to Rs. 2,524 as compared with Rs. 11,315 in the previous year.

In connection with the Licensed Warehouse and Fire Brigade Act, I of 1893, during the year under review 5,196 inspections have been made (exclusive of theatres and places of public amusement); 319 applications for licenses and complaints have been attended to and disposed of. One hundred and eighty-seven prosecutions were instituted under section 14 of Act I of 1893, which resulted in 139 persons being fined aggregating in all Rs. 2,744, 21 persons being warned, 11 acquitted and 16 cases withdrawn and filed.

16. Fire Brigade-Workshops.—Under the heading of “Fire Stations” reference has been made to the Brigade Workshop. The workshops at headquarters are inadequate for the amount and class of work to be done, and when new and up-to-date workshops are provided repairs and building of machines will be greatly facilitated. Although the number of machines in the Brigade has greatly increased during the past few years the strength of the workshop staff has remained practically the same, and additions will have to be made to the staff.

17. General.—The Calcutta Fire Brigade protects the municipalities of Calcutta, Cossipore-Chitpur, Howrah, Maniktala and Garden Reach and may attend fires outside the boundaries of these municipalities, but not exceeding a radius of 6 miles from the Central Fire Station, provided that appliances can be spared and on payment of a prescribed fee. Appendix XIX gives the Government order relating to this and the form which should be signed prior to the Fire Brigade leaving the jurisdiction of the above municipalities. The actual area protected by the Calcutta Fire Brigade is just over 113 square miles and the population included in same is about 1½ millions.

18. **Ambulance Service.**—The Motor Ambulance Service has a lot of valuable work, no less than 13,785 calls having been received during the year under review as compared with 16,060 calls in the previous year.
